CAREER OBJECTIVE

Full Stack Developer with hands-on experience in React.js, Node.js, Express.js, MongoDB, and REST APIs. Built and deployed full-stack web applications with authentication, CRUD operations, and responsive user interfaces.

EDUCATION

Bachelor of Business Administration, 2020 - 2023
Rajiv Gandhi College

CGPA: 7.86/10

Senior Secondary (XII), HP Board Of School Education 2020
Govt Secondary School Chauntra

Percentage: 71.00%

Secondary (X), HP Board Of School Education 2018
Govt Secondary High School Chauntra

Percentage: 76.00%

TRAININGS / CERTIFICATIONS

Full Stack Development
Mar 2026 - Sep 2026

Internshala, Virtual

- Fundamentals of Full Stack Development
- Web Page Designing (HTML and CSS)
- Git and GitHub: Version Control
- Websites Development (JavaScript)
- Data Structures and Algorithms (DSA) in JavaScript
- Web Applications Building (React)
- Node.js, Express.js and MongoDB for Web Development

PORTFOLIO

PROJECTS

MovieHub – Movie Discovery Platform ↗
Oct 2026

- Developed a full-stack movie discovery platform using the MERN stack with JWT-based authentication and protected routes.
- Integrated a movie API to enable movie discovery and search, with movie details and pagination.
- Implemented WhatsApp OTP-based phone verification, password reset, and secure password hashing.
- Built a personalized watchlist feature, allowing users to save and manage movies.

HotelHub – Hotel Booking Platform ↗
Oct 2026

- Developed a full-stack hotel booking platform using MongoDB, Express.js, React, and Node.js.
- Implemented user authentication, hotel listings, room management, and booking workflows with role-based access control.
- Integrated Razorpay payment processing and real-time chat functionality.
- Built backend APIs with database integration and email notifications for booking-related updates.

YouTube clone ↗
Sep 2026

- Built a full-stack YouTube-inspired video streaming platform using the MERN stack, with RESTful APIs, MongoDB schemas, and JWT-based authentication.
- Developed a modular backend with routes, controllers, and models for secure video upload, retrieval, and content management.

NoExcuse – Daily Task Management Website ↗
Sep 2026

- Developed a full-stack daily task management application using the MERN stack with JWT-based authentication and protected routes.
- Built features to create, update, complete, and delete daily tasks with a dashboard for tracking tasks and deadlines.

Zomato: A Food-Reels & Ordering Platform ↗
Sep 2026

- Built a full-stack food-discovery app using React, Node.js, Express, and MongoDB with a reels-style feed, food partner profiles, likes/comments/saves, and real-time chat.
- Implemented secure JWT-based authentication with role-based access (user vs. food partner) and cookie-based sessions for production-grade security.

SKILLS

- HTML
- GitHub
- React
- Node.js
- MERN
- Next.js
- CSS
- JavaScript
- Redux
- Express.js
- Generative AI Tools
- MySQL
- Tailwind CSS
- Data Structures
- MongoDB
- REST API
- ChatGPT
- Web development
